

1st ICCMO INDIA CONGRESS

India's Step Forward in the Neuromuscular Dentistry Revolution

“Measuring Occlusion and Muscle Physiology”

DATE : 25TH & 26TH AUGUST 2018 | VENUE : THE CAPITOL, BANGALORE

Mechanical therapy has shown its efficiency regarding TMJ disorders. But whatever the approach is, a myofunctional rehabilitation is required to stabilise the results. Several approaches make it possible to obtain postural and praxis modifications, but current neuroscience data highlights the superiority of autonomous and subcortical actions.

Froggy-mouth is the only device which causes biochemical modifications and dysfunctional programs inhibition. The functional RMI shows its efficiency when it comes to sensory-motor areas.

Dr. Fellus will give you a brief description on the working of the Froggy-mouth.
